

Data and programs

Economic growth and political survival

Paul J. Burke

*Feel free to use these data and codes. Please cite:

Burke, P.J. "Economic Growth and Political Survival." *B.E. Journal of Macroeconomics*.

The folder should be extracted to the C drive.

A. Data

The data are described in the paper, and variable definitions are provided in the Appendix. The data needed to replicate the results are provided in Stata files. All variables are labeled (type "describe" to see variable labels).

The data files are:

1. Burke.dta – these are the main data used.
2. The other files are the data used in the construction of the export partner growth instrument.

B. Programs

There are two Stata do files. These are:

1. Burke - BE Macro.do – this is the main do file.
2. Burke - BE Macro - Export partner growth variables.do – this file is used for the construction of the export partner growth variables.
