## History of Loan programs

## Regular Loan Program

(1) Starting from 2009, $2^{\text {nd }}$ semester
(2) Eligibility: Undergraduate and Graduate, Below of age 55 Regardless of Family Income Level Enrolled students should have completed 12 or more credits and have a grade of 70 or higher out of 100 in the previous semester
(3) Loan Limit: Full Tuition \& Fees and Living Expense(up to 2M Won per year)
(4) Loan Period: Maximum 20 years
-(Deferment Period) Interest Repayment only - Max 10 years
-(Repayment Period) Interest and Principal Repayment - Max 10 years
(5) Interest Rate: Fixed Rate('17.1 ${ }^{\text {st }}$ Semester 2.25\%)
(1) Starting from 2010
(2) Eligibility: Undergraduate

Below of age 35
Family Income Level of 8/10 or lower
Enrolled students should have completed 12 or more credits and have a grade of 70 or higher out of 100 in the previous semester
(3) Loan Limit: Full Tuition \& Fees and Living Expense(up to 3M Won per year)
(4) Loan Period:
-(Repayment Period) From the year of income level 18.56M won/year (Repayment Rate) 20\% of yearly income exceeding 18.56M won (Repayment Method) Automatic payroll deduction by National Tax Authority
(5) Interest Rate: Floating Rate(' $17.1^{\text {st }}$ semester 2.25\%)

## Financial Projection of Regular Loan Program

- Cash flow projection for regular loan program
- Grouping borrows according to
$\mathrm{g}=$ (deferment period, repayment period)
$F_{t}=\left(\sum_{g=1} B_{g, t}+a \times \sum_{g=1} r_{g} \times B_{g, t-1}\right)-\sum_{g=1} R_{g, t}+\sum_{g=1} A_{g, t}\left(X_{t}\right)$
$B_{i, t}=B_{i, t-1}-I\left[m_{i, t-1}=0\right] \times I\left[d_{i, t}=0\right] \times \frac{B_{i, 0}}{n_{i}}$
$B_{q, t}=\left\{\begin{array}{l}B_{q, 0} \text { if } t \leq t_{1} \\ B_{Q, t-1}-\left(1-\alpha_{Q}\right) \frac{1}{n_{g}} B_{g, 0} \text { if } t>t_{1}\end{array}\right.$
$R_{q, t}=a_{t} \times\left(1-\alpha_{q, t}\right) \times r_{g} \times B_{g, t-1}$
$t_{1}$ : ending period of deferment
$g$ : group (deferment period, payment period)
$d_{g}$ : probability of default for group $g$
$B_{i t}$ : principal Balance of account i at t
$B_{i o}$ : Beginning Balance of account i
$n_{i}$ : contractual repayment period of account i
$m_{i, t-1}$ : remaining deferment period of account $i$ at ( $\mathrm{t}-1$ )
$r_{i}$ : interest rate of account i
$R_{i t}$ : interest accrual of account i at t
$A_{i t}$ : new loan amount for account i at t
$d_{i t}$ : default indicator
$X_{t}$ : demographic and macroeconomic factors at t

## Financial Projection of Regular Loan Program : $:{ }^{\circ}$ kif

- (Existing Account);
- Grouping by (deferment period, repayment period)
- Cash flow according to new loan, interest repayment, principal repayment, and default rate.
- Default probability is estimated by Probit Regression for each group
- (Estimation of Future Loan Demand);
- Mainly driven by demographic factor and macro economy
- Macro economic assumption of CPI and tuition growth
end of period loan balance $=($ principal balance of existing account) + (interest accrual at t ) - (interest and principal repayment at t ) + (new loan supply at t)

## Financial Projection of Regular Loan Program $\because:{ }^{\circ}$ kif

## Financial Projection of ICL

- Stylized facts and estimation strategy
- Voluntary Repayment is much more substantial than mandatory repayment
- Labor market participation assumption is very crucial
- Matching our available repayment data(2010~2015) with cash flow from dynamic labor market model prediction
- Assumption
$\checkmark$ Part-time workers are not paying back mandatory repayment.
$\checkmark$ Full-time worker wage is based on wage data of Statistics Bureau.
$\checkmark$ Remaining loan balance until the age of 40 is assumed to be not payed back.

## Table of Contents

## I. Student Loan Programs in Korea

II. Financial Projections of Regular Loan and

ICL
III. Policy Issues

## Policy Issues

- Long term financial projection of KOSAF
- Limited data ( $5 \sim 6$ years)
- Voluntary repayment is substantial.
- Behind motives of 'voluntary repayment' is black-box:
$\checkmark$ family support
$\checkmark$ concerns for accumulation of interests and etc.

## Policy Issues

- Policy direction of Korean Gov. and Political Parties
- Decrease of loan interest rate
- Interest rate determination: Discretion based $\rightarrow$ Rule based
$\checkmark$ Funding rate based.
$\checkmark$ Market rate based
$\checkmark$ Risk based : Funding rate $+\alpha$ (risk premium)
$\checkmark$ Social Subsidy based
$\checkmark$ Surcharge
- Optimization of KOSAF funding structure: ALM
$\checkmark$ Long-term financial projections
$\checkmark$ Minimization of spreads of KOSAF bonds
- Interest subsidy for low income level households
- Income tax deduction for repayments of loans
- More favorable asset-to-income conversion formula to verify income level
- More generous loan applicability criterion
$\checkmark$ Age
$\checkmark$ Income level
$\checkmark$ GPA limit
$\checkmark$ Foreign college
$\checkmark$ Increase of loan amount (living expenses)
