This event is free and open to the public.

How should the world approach the opportunities and risks of artificial intelligence? Join experts from Australia and Europe as they discuss trends in public policy, research and industry, in particular as they relate to the Australian Government's newly released *Australia's Tech Future* strategy.

The morning panel explores national policies presented by the European Commission, EU member states and the Australian Government. It is a forum for sharing experiences and policy directions and comparing approaches.

The afternoon session involves workshops on security, law and policy, health, education, arts and culture and robotic vision, followed by networking cocktails.

Don't miss this crucial discussion hosted at ANU Crawford School in collaboration with the 3A Institute, ANU Law School, and the National Security College, and supported by the European Commission's EPIC project.

Presented by

Crawford School of
Public Policy

ANU College of
Asia & the Pacific
