PNG's economic trajectory: The long view

Friday 30 July 12:30–1:30pm (AEST)

The absence of good time series data makes it difficult to analyse the economic history of PNG. This paper aims to fill this gap by providing time series for various important economic indicators since independence in 1975 or as close as possible thereafter. The data will be available online for researchers as the PNG Economic Database, which is the source for the 36 graphs in the paper. The chapter also contains some analysis to tie the data together and begin to realise their value, and includes a summary of 15 findings of particular interest.

The ANU-UPNG seminar series is part of the partnership between the ANU Crawford School of Public Policy and the UPNG School of Business and Public Policy, supported by the PNG-Aus Partnership.

This seminar is free and open to the public. Registration is required to attend the seminar. You can attend at the Acton Theatre (Crawford School of Public Policy, ANU), at the MBA Suite (SBPP building, UPNG), or online via Zoom.

Speaker

Professor Stephen Howes

Director, Development Policy Centre, ANU

Rohan Fox

Research Officer, Development Policy Centre, ANU
